Martinette Pieterse
Old Railway Station Complex, Carmody Place, Bunbury WA 6230

Dear Martinette

Re: Notification of intention to utilise facility as required for the “Waste Disposal Facility – Wastes from Waroona Complex Bushfire Recovery Project”.

Thank you for your submission for the above requirement.

We have now completed our evaluation of all the proposals received, and I am pleased to advise that your submission has been one of those accepted. Toxfree intends on issuing a number of Work Orders for waste types able to be accepted to only a few select suppliers based on the following selection criteria:

- Ability to accept categories of waste most likely to be encountered in line with existing Landfill License conditions;
- Capacity to receive wastes (volume per day);
- Proximity to Yalooop and transport routes;
- Value for money;
- Mitigation of risk of higher classification (i.e. Class 3 Wastes) being inadvertently delivered to lower classification facilities;
- Minimisation of need to double handle wastes – i.e. handle, sort and transfer to a third party facility;
- Timeliness in obtaining appropriate License condition variations (if not currently in place)
- Certified OHS&E systems and in place Asbestos Management Plans;
- High level waste tracking and weighing capability;
- Adequate insurances;
- Ability to work cohesively with Toxfree and other Project team contractors.

Time of commencement

Unless prior arrangement has been sort, Work Orders will commence from Monday 27 June 2016. Prices shall be fixed as submitted for a six-month period.

Due to the nature of the project and non-homogenised set of waste streams, there will be a number of suppliers engaged for similar services dependant on waste types and logistics and as such, Toxfree cannot guarantee volumes. The Project is currently fully operational, and as such, overall volumes will eventually begin diminishing. If there is a delay in your facility obtaining the appropriate licensing this will limit the potential volumes available.

Supplier documents

Prior to supplier engagement can we please request that the following documentations are completed and supplied (if not already done so):

- DER Waste Facility License highlighting the fact that you can accept the waste types for which pricing has been submitted;
- Copies of your insurances;
- Copy of your OHS&E Plans;
- Copy of your Asbestos Management Plan.

A member of our projects team will be in touch shortly to discuss any further requirements.

Yours sincerely
